Objective:

Aspiring Front-End Developer with hands-on experience in React.js and Vue.js, completed a front-end course at Route Academy and internships at Web Masters and Arab Apps company, where I worked with React, Next.js, Vue 3, Nuxt. Seeking an entry-level role to apply my skills in modern front-end development and contribute to building engaging, responsive web applications.

Courses and Internships:

Front-End Development Intern, Arab Apps   (Mar 2025 – June 2025)

- Contributed to real-world front-end projects using **Vue 3**, **Nuxt**, and **TypeScript**, along with **React** and **Next.js** in a team-based environment.
- Translated UI designs from **Figma** into responsive, accessible components.
- Worked with **REST APIs**, handled state management, and implemented reusable components.
- Collaborated with developers using **Git** and **GitHub**, following modern development workflows (branches, pull requests, code reviews).
- Gained hands-on experience in debugging, performance optimization, and deploying front-end features in production-like settings.

Front-End internship, Web Masters   (Sep 2024 – Present)

- Developing problem solving skills using JavaScript.
- Working on practical projects using frontend technologies.
- Improving the codebase by enhancing readability, maintainability, and optimizing performance.

Front-End Diploma, Route Academy   (December 2023 – June 2024)

Technical skills:

Languages: HTML, CSS, JavaScript, Typescript, Sass.

Frameworks/Libraries: React JS, Vue 3, Next.js, Nuxt, Redux Toolkit, Pinia, Vuex, i18n, jQuery, Bootstrap, TailwindCss, Material UI, Vuetify, PrimeReact, Framer Motion.

Tools: Git, GitHub, NPM, Chrome DevTools, Figma.

Education:

BCs, Faculty of Al-Alsun, Kafr Al-Sheik University   (September 2018 –May 2022)

Department: Spanish language and English as a second language

Grade: Very good with honors

Projects:

Trio-SND (Shipping services platform) - [Demo Link]

Developed a responsive web platform that connects users with delivery service providers. Implemented multi-step forms, order tracking, and API integration using Axios.

Built with Nuxt 3 for SSR and improved performance, Tailwind and Vuetify for UI, Pinia for state management, vee-validate and yup for hundling forms and i18n for internationalization.

Weather application - [Demo Link]
Built a weather application using React js, Redux toolkit, Material ui and Weather API to fetch and display real-time weather data, with responsive design and geolocation features.

Fresh-Cart E-Commerce - [Demo Link]
Developed a dynamic e-commerce application using React, Context API and TailwindCss, implementing features like product searching, shopping cart functionality, and user authentication

To-do-list App - [Demo Link]
Developed a to-do list application allowing users to add, update, delete, search and mark tasks as completed using HTML, CSS, JavaScript, Bootstrap. Implemented task management functionality and utilized local storage for data persistence.
